

# GPSSR Product Safety **User Guide**

PrestaShop module · Compatible with PrestaShop 1.7, 8 and 9

---

## Sell in the EU **fully GPSSR compliant**

GPSSR Product Safety makes your store compliant with Regulation (EU) 2023/988. Declare your EU economic operators, assign a manufacturer and responsible person per product, and show safety warnings, usage instructions, hazard pictograms and conformity documents right on the product page. Bulk assignment and configurable defaults keep large catalogues fast to manage. No coding, no theme edits.

### 1. Installation

1. In the back office go to **Modules** → **Module Manager** → **Upload a module** and select the module ZIP.
2. Once installed, click **Configure** to open the setup wizard.

**Updates are automatic.** They are tied to your domain — no licence key to enter. Development domains ( `.local` , `.test` , `localhost` ) are always allowed. When a new version is available it is shown right inside the module.

### 2. Configuration — step by step

The Configure screen has three tabs: **Economic operators** (your GPSSR-responsible persons), **Bulk assignment** (apply them to many products at once) and **Settings** (toggles, defaults and the front-office block). They all live on one screen.

## Settings

The Settings tab controls what the module does and how the GPSR block looks on the product page.

**Master toggles** — turn the features on or off:

- **Enable module** — the on/off switch for the whole module. Nothing is added to your front office until this is enabled.
- **Show GPSR block on product page** — display the compliance block on the product detail page.
- **Show pictograms** — display CLP/GHS hazard pictograms.
- **Show documents** — display the conformity documents attached to a product.
- **Fall back to product manufacturer** — when a product has no responsible person set, use the product's own manufacturer name automatically.

**Economic operators & defaults** — declare who is responsible:

- On the **Economic operators** tab, add each operator (manufacturer, importer, authorised representative or distributor) with name, address, email, phone and website.
- **Default responsible person** — the shop-wide operator used when a product has none assigned.
- **Default manufacturer name** — a text fallback used when no person is assigned and the manufacturer fallback is off.
- **Block title** — the heading shown above the GPSR block, editable per language (e.g. "Safety information (GPSR)").

**Bulk assignment** — on the dedicated tab you can apply a responsible person and/or a manufacturer name to a whole category or to a list of product IDs in one click, instead of editing products one by one. Leave a field unchanged to keep the current value, or clear it to fall back to the shop default.

**Drop data on uninstall** — when off (the default), all GPSR data is kept if you uninstall the module; turn it on only if you want everything removed.

Enable module	<input checked="" type="checkbox"/>
Show GPSR block on product page	<input checked="" type="checkbox"/>
Fall back to product manufacturer	<input checked="" type="checkbox"/>
Show pictograms	<input checked="" type="checkbox"/>
Show documents	<input checked="" type="checkbox"/>
Default responsible person	<input type="text" value="-- none --"/>
Default manufacturer name	<input type="text"/>
Block title (en)	<input type="text" value="Safety information (GPSR)"/>
Block title (it)	<input type="text" value="Safety information (GPSR)"/>
Drop data on uninstall	<input type="checkbox"/>
	<i>If unchecked, GPSR data is kept when the module is uninstalled.</i>
<input type="button" value="Save"/>	

Settings — toggles, economic operators, defaults and the front-office block

### 3. Check that it works

- Open a product that has a responsible person assigned — the GPSR block should appear on the product page with your block title.
- Confirm the manufacturer / responsible person, safety warnings and usage instructions are shown.
- If you enabled pictograms and documents, check the hazard pictograms and the downloadable conformity documents appear.
- For a product with no person set, verify the shop default (or product manufacturer) is used as the fallback.

### 4. FAQ

#### Do I have to fill in every product manually?

No. Use the Bulk assignment tab to apply a responsible person and manufacturer to a whole category or a list of products at once, and set shop-wide defaults for the rest.

#### Do I need to edit my theme?

No. The GPSR block is added through standard hooks and is compatible with any theme.

#### What happens to my data if I uninstall?

By default your GPSR data is kept. It is only deleted if you explicitly turn on "Drop data on uninstall".

#### Can I customise the block heading?

Yes. The block title is editable per language in the Settings tab.
